Engine set for garage sectional door includes electrical engine, metal installation construction (rails) and 2 remotes.

Depending on the model of the garage, additional accessories may be required for installation.

Electrical connection required!

ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

Black roofing felt (underlayer)

SBS roofing material

Black shingles

Black EPDM (includes adhesive for installation)

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers quite a wide range of flat roof cabins.

A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of "Optional" under each flat roof house there is mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

Here are some of the benefits why we truly recommend you to invest in EPDM roof covering material:

- reduces potential condensations problems that can erode performance
- long average service life (can last up to 20 years)
- EPDM is the most dimensionally stable heat resistance membrane and stays flexible even in extremely cold conditions.

EPDM users in colder climate can also benefit from:

- reduced heating costs
- reduced carbon footprint by lowering heating costs
- reduced safety hazard from snow and ice accumulation

We offer EPDM in ready-cut-pieces, the article number of suitable EPDM is given in the table of optional products after every product group and in Optional Products part at the end of the catalogue.

Our EPDM set includes wet-adhesive for installation.

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

FLOORS

To meet the specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako starts to offer unified floor kits in such a cases.

An unified floor kit contains of:

- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening (in two sizes - for a single door and a double door) and the wall thickness.

Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

ADDITIONAL DOORS AND WINDOWS

Majority of our cabins and buildings are designed in a way, that one can easily amend it with additional door(s) and window(s) in addition to the existing ones. So far Palmako offered limited range of additional doors and windows. As of 2021 we offer full range of doors and windows suitable to our buildings. For example our cozy and classical cabin Sally 15,5 m² has just one double window in original set. If one wishes a more lightful cabin, it can be easily amended by exactly same type of additional window (Art. No. 103502). As one building can consist of different size and model of doors and windows, please consult with our sales team before placing an order.

With standard doors Palmako provides door handle and lock cover kit. Shall one need to change the existing door handle and lock cover kit or just needs one extra, we are more than glad to deliver.

Art. No. 108422

* Article number is given as natural wood (NO treatment). If the house has treatment options, one also can order additional door(s) and window(s) with the same treatment. Just consult with our sales team or representative.

PLYWOOD DOORS

If you have built a garden house, shed or have in your garden some other ancillary building that needs a good and proper door in front of it then please get familiar with doors on this page. We have added to our windows and doors selection single and double doors made of plywood. With or without glass, just as you like the best.

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture, machine rounded posts, flowerboxes, log rolls and many other products.

Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service. Depending on the product type we are able to treat the products in different ways.

Dipping bath for treatment

DIPPING

As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarpap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1-3. The brown and grey dipping treatment can enhance the colour of your house, but the clear white dipping works for the pre-paint preparation stage.

GYDIP grey dip

BNDIP brown dip

PRESSURE-TREATING

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. Depending on model fence panels can be grey or green pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

GYVPI grey pressure-treated

GNVPI green pressure-treated

PAINTING

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white or dark grey, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter

long drying chamber, where the whole process of drying can be adjusted and observed.

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

GYPNT1+2 primer + grey painted 2 layers (RAL 7016)

PRIMING

Using the same technique, we are now also able to coat several houses with one layer of white primer (WTPNT1+0), which simplifies the further finishing of the product.

WTPNT1+0 white primer

WTPNT1+0 white primer

Painted products in drying chamber

You will find available treatment options next to each product under Treatment Options section. Please get familiar with the article number and description of the treatment we offer as follows:

Art. No.	Description	Treatment
NO	Natural, untreated wood	
BNDIP	Brown dip	
GYDIP	Grey dip	
WTDIP	Clear white dip	
GNVPI	Green pressure-treated	
GYVPI	Grey pressure-treated	
BNVPI	Brown pressure-treated	
GNVPIH4	Green pressure-treated HC4	
GNVPIA	Green pressure-treated NTR-A	
WTPNT1+0	White primer	
WTPNT1+2	Primer + white painted 2 layers (RAL 9016)	
GYPNT1+2	Primer + grey painted 2 layers (RAL 7016)	

Palmako

LEMEKS GROUP

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, and weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture and log rolls.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified and products made from FSC timber have been marked accordingly.

Almost 25 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
